```
3. Saving
Here's how you save a document to MongoDB:
db.scores.save({a: 99});

This says, "save the document '{a: 99}' to the 'scores' collection."
Go ahead and try it. Then, to see if the document was saved, try
db.scores.find();
Once you've tried this, type 'next'.
```

```
> db.scores.save({a: 99});
"ok"
> db.scores.find()

[
  { "a" : 99, "_id" : { "$oid" : "5148bd2ccc93742c16034f5e" } } ]
> next
```
